PROFILE

Detail-oriented Frontend Developer specializing in React.js and WordPress with hands-on experience building responsive, high-performance web applications and dynamic websites. Strong in translating Figma designs into clean, scalable code using modern tools like Tailwind CSS, JavaScript (ES6+), and WordPress customization. Eager to contribute to real-world projects and grow in a professional development environment

PROJECTS

Portfolio Website

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript
- Optimized the design for mobile, tablet, and desktop devices

React Web Application

- Built a dynamic web application using React.js and reusable components
- Improved scalability and performance with component-based architecture

WordPress Website Development

- Created responsive WordPress websites for business and portfolio projects
- Customized themes and plugins to improve functionality and user experience

WordPress Website Development

- Converted Figma UI designs into responsive web pages
- Maintained design accuracy and responsive performance across devices

EXPERIENCE

Frontend Developer

Self-employed / Remote

- Developed responsive websites using HTML, CSS, Tailwind CSS, JavaScript, and WordPress
- Converted Figma designs into pixel-perfect and user-friendly web interfaces
- Built reusable components using React.js for scalable applications
- Ensured mobile-friendly and cross-browser compatible layouts
- Improved website performance, responsiveness, and UI consistency
